

Teaching Sustainability in Quality Improvement (SusQI)

CENTRE for
SUSTAINABLE
HEALTHCARE
inspire • empower • transform

With our Teaching Sustainability in Quality Improvement (SusQI) course your team will expand their knowledge and skills, stay ahead in their field, and enhance the quality of care to patients.

Who is this course good for?

Any educators of healthcare professions at both undergraduate and postgraduate level. This includes health professionals at any stage, non-clinical staff such as academics, quality improvement /continuous improvement/transformation managers and sustainability/environmental managers/officers. The course was developed with the support of Health Education England, King's College London and the Health Foundation.

Builds the skills and confidence to teach the SusQI framework and integrate it into mainstream education programmes, empowering learners to conduct their own SusQI projects.

Learning from real examples, participants explore existing educational resources which can be adapted and applied on their own to develop preventative, holistic, lean, low-carbon, high-quality care.

Opportunity to network and peer learning. Earn valuable Continuing Professional Development (CPD) credits, ensuring you meet your professional development requirements while improving your expertise.

“The content is excellent. I really like the mix of theory, links to resources and questions at the end”

Course attendee

8 hours of guided self-study with regularly updated materials

4-hour virtual workshop with subject specialists

Continued group mentoring to keep projects moving

Costs start from £132 for individuals and from £170 + VAT per person for block bookings. To support equitable access to our courses, our pricing system is based on declared personal income. Discounts are available for multiple bookings by organisations to support workforce development.
